

STRATEGIC MANAGEMENT ASSISTANCE

Applied Management Systems, Inc.'s Strategic Management Assistance Program is designed to provide participating organizations access to all of AMS' expertise while saving them time and money. By entering into a multi-year contract, the participating clients save management time, shorten the elapsed calendar timeframe to initiate projects and receive a reduced consulting rate.

Highlights of the program:

Ready access to AMS expertise. Projects can be initiated quickly based on approved workplans. No need for individual project proposals and service agreements.

Predictable cash flow through uniform monthly billing, with annual rate adjustments that have averaged under 5%. The initial program has a three-year commitment.

Ability to conduct projects as required, when required. Strategic Management Assistance clients can use AMS time in advance. Clients can borrow ahead on AMS consulting time up to six months without any adjustment to the monthly payment schedule.

There is a 10-20%-an-hour discount on consulting rates that AMS already considers "a value." The level of the discount is based on the amount of services purchased.

AMS senior management can participate upon request in any client senior team meeting or retreat. This can be related to specific client projects or general healthcare industry topics.
